Muhammad Adeel

Senior Frontend Engineer | React.js, TypeScript, Redux, Accessible UI & SaaS

adeelmuhammad146@gmail.com | +92 307 4377962 | Lahore, Pakistan (Remote)
github.com/adeel146 | linkedin.com/in/adeel-reactjs-developer

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux state management, HTML5, CSS, responsive UI, reusable component architecture, cross-browser compatibility.

UI & Accessibility: Storybook, Figma, Tailwind CSS, Material UI, Styled Components, LIT Framework, WCAG accessibility, AEM, server-side rendering (SSR).

Testing & Delivery: Jest, React Testing Library, Playwright, unit and integration testing, end-to-end regression testing, Git, GitHub Actions, code reviews, Agile/Scrum.

Cloud & Collaboration: Microsoft Azure, AWS, Azure Boards, technical documentation, mentoring, stakeholder communication, remote cross-functional collaboration.

WORK EXPERIENCE

Senior Software Engineer, Lumovy Technology Solutions (Client: Microsoft)

March 2024 - Present | Remote

Project: Microsoft.com Website - Surface Laptop & Accessibility

- Developed responsive TypeScript components for Microsoft.com, including Surface Laptop and Defender for Cloud pages, prioritizing maintainability and cross-browser compatibility.
- Built 25+ reusable LIT web components and documented them in Storybook, providing consistent UI patterns for content-driven experiences.
- Implemented WCAG 2.1 AA accessibility across 10+ pages, including keyboard navigation, dark mode, and NVDA screen reader support; remediated 15+ accessibility findings.
- Created 100+ unit tests and automated Playwright end-to-end regression testing, reducing manual QA effort by approximately 60%.
- Improved SSR and frontend performance, cutting page-load time by 35% and increasing Lighthouse scores by 20+ points.
- Secured 20+ frontend components against XSS, including fixing unsafe context escaping in shared AEM templates.

Project: Cascade Content Studio - Content Generation Platform

- Collaborated remotely with product managers, engineers, designers, QA, and DevOps in a cross-functional team of 10+, defining requirements and delivering enterprise features in two-week sprints.
- Led code reviews and mentored eight engineers on clean code, SOLID principles, and SDLC practices; reduced incident-resolution time by 60% through root-cause analysis and monitoring.
- Built a Playwright suite using the Page Object Model and mocked authentication to validate complete BYOC and Start New Project user journeys.
- Enforced template-specific validation and content guardrails in AEM dialogs to prevent production content errors.
- Supported delivery across the SDLC through automated testing, CI/CD, deployment support, technical documentation, and continuous improvement.

Senior Software Engineer, Graffitecs Solutions

2023 - 2024

Project: Community Facilities Planning Calculator (CFPC)

- Led six frontend engineers, gathering business requirements and coordinating with backend and UI/UX teams to deliver a cloud-based SaaS planning calculator.
- Designed data-input and visualization interfaces and implemented statistical formulas across 15+ demographic variables and facility types.
- Replaced a manual Excel-based workflow with a cloud application, improving planning and calculation speed by 50% and reducing data-entry and review time by approximately 30%.

Projects: The Gate, Three60 & Resleeve AI

- Built The Gate with Next.js, including an admin-configurable approval-workflow builder supporting 20+ templates; reduced manual approval effort by approximately 40%.
- Owned Three60 delivery from planning through execution with a four-person team, building 20+ responsive React components and achieving 90%+ coverage on core components with Jest and React Testing Library.

- Delivered four Resleeve AI design features through a user-friendly interface, reducing average design-iteration time by approximately 25%.
- Built 30+ reusable components across projects and implemented Redux state management, reducing new-feature development time by approximately 20%.
- Collaborated with product managers, designers, and backend engineers; reviewed 20+ pull requests per month and mentored three team members.

Senior Software Engineer / Frontend, ILI Digital

2022 - 2023

Projects: BASF Battery Recycling (with BMW) & mcyclo

- Developed 10+ React pages supporting recycling orders across BMW Dealer, BASF Logistics, and BMW OEM roles; helped fully automate the previously manual recycling process.
- Contributed to mcyclo's take-back and recycling experience supporting 50+ partner collection points in Germany.
- Built and maintained TypeScript, React.js, and Next.js applications with Redux; implemented unit and integration tests using Jest and React Testing Library.
- Optimized application performance, reducing page-load time by approximately 25%; resolved defects, performed code reviews, and maintained technical documentation.

Software Engineer / Frontend Developer, Nextbridge (Pvt) Ltd

2021 - 2022

- Maintained production React applications, resolved 50+ bugs, and developed 15+ custom components to meet evolving requirements.
- Collaborated with a cross-functional team of 6+ to design, develop, and deploy responsive applications; improved mobile page-load time by approximately 20%.
- Maintained dependencies across three repositories and contributed reusable UI components, documented code, and peer reviews.

EDUCATION

University of the Punjab | 2018

Bachelor of Business and Information Technology

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) - SCRUMstudy
